ENVIRONMENTAL POLICY

Cittadella, 12 December 2024

This document establishes the principles and commitments through which the Management intends to support and improve the Company's environmental performance.

The commitment to environmental protection can be summarized in the following elements, which constitute a framework of reference for the objectives the Company intends to pursue:

- Commitment to the protection of the environment and to the prevention of pollution through effective operational and production management.
- Implementation of an Environmental Management System based on the principle of monitoring environmental performance and continuous improvement.
- Compliance with applicable environmental legislation, relevant regulations, and company procedures relating to environmental protection.
- Adoption of processes and technologies that prevent and/or reduce environmental impacts.
- Management of production activities with the aim of reducing their environmental impacts, with particular attention to waste management, promoting reduction and reuse.
- Optimization of energy consumption, increasing, where possible, the use of reusable and recyclable materials.
- Awareness-raising actions to enhance the degree of awareness, involvement, and participation of employees regarding environmental implications.

Management undertakes to make available adequate resources and means for the achievement of the stated objectives, and to periodically verify their implementation and adequacy.
